

2-Day Workshop on “Good Manufacturing Practices (GMP) Compliance for Pharmaceutical Industry”

Jointly Organized by NABET & NABL

The Indian Pharmaceutical Industry is one of the most vibrant sectors of Indian economy. The total size of the Indian Pharmaceutical Industry is about Rs 2 lakh crore, out of which exports account for nearly 55%. To ensure the quality, safety and efficiency of medicines both for domestic use and for exports, the manufacturing systems involved must be strengthened. As the number of drugs and their volume, increases, the issue of quality will assume paramount importance. Good manufacturing practice (GMP) is a system for ensuring that products are consistently produced and controlled according to quality standards. It is designed to minimize the risks involved in any pharmaceutical production that cannot be eliminated through testing the final product.

Why You Cannot Miss this Event!!!

- The workshop has been envisaged to help you implement into an organization the increasing legislation and guidance on goods within the pharmaceutical industry.
- Enhancing the inspection and training skills of the Controlling officers of Indian drug regulators on advanced GMP
- It will help you to understand the role of inter-departmental QMS controls in the entire pharmaceutical supply chain and how to effectively document and continually improve the systems in place to ensure standards that are GMP compliant.

QCI in its efforts to bolster ‘Manufacturing Excellence Forum is gathering some of the most successful practitioners from the globe and India, thereby bringing innovation and collaboration to achieve true excellence. This forum shall provide a platform, to upgrade yourself with latest industry trends and learn best manufacturing practices currently being adopted in the Pharmaceutical Industry
